Soil & Tillage Research, 24 (1992) 445–447
Elsevier Science Publishers B.V., Amsterdam

Contents of *Soil and Tillage Research*, Volume 24

Vol.24 No. 1 June 1992

Maize yield and nitrogen uptake after established no-tillage fields are plowed
W.A. Dick, R.C. Stehouwer (Wooster, OH, USA), W.M. Edwards (Coshocton, OH, USA), R.C. Stehouwer and D.J. Eckert (Columbus, OH, USA) 1
Characterization of soil temperature, water content, and maize root distribution in two tillage systems
J.L. Kovar (West Lafayette, IN, USA), E.J. Kladivko and D.R. Griffith (West Lafayette, IN, USA) 11
Effects of tillage on heathland soil: disturbance of a natural mountain fynbos system in the southwestern Cape, South Africa
G.W. Davis (Rondebosch, South Africa) 29
Structural degradation of two Vertisols under continuous cultivation
G.D. Cook, H.B. So (St. Lucia, Qld., Australia) and R.C. Dalal (Toowoomba, Qld., Australia) 47
Simulated harvest-traffic effects on corn, oats and soybean yields in western Ohio
R. Lal and H. Tanaka (Columbus, OH, USA) 65
Sensing of aggregate size by means of a horizontal mini-penetrometer
H.J. Olsen (Uppsala, Sweden) 79

Book Reviews
Fragipans 95
Tillage Systems 96
Heat and Water Transfer 96

Vol. 24 No. 2 July 1992

Guest Editorial
Soil physics towards 2000
A.R. Dexter (Bedford, UK) and I.M. Young (Dundee, UK) 101
The effect of compaction on the growth of pigeonpea on clay soils I. Mechanisms of crop response and seasonal effects on a vertisol in a sub-humid environment
J.A. Kirkegaard, H.B. So, R.J. Troedson and E.S. Wallis (St. Lucia, Qld., Australia) 107
The effect of compaction on the growth of pigeonpea on clay soils. II. Mechanisms of crop response and seasonal effects on an oxisol in a humid coastal environment
J.A. Kirkegaard, R.J. Troedson, H.B. So and B.L. Kushwaha (St. Lucia, Qld., Australia) 129
Immediate and residual effects of zone-tillage in rotation with no-tillage on soil physical properties and corn performance
F.J. Pierce, M.J. Stanton (East Lansing, MI, USA) and M.C. Fortin (Ottawa, Ont., Canada) 149
Tillage management for efficient water and nitrogen use in wheat following rice
P.R. Gajri, V.K. Arora and S.S. Prihar (Ludhiana, India) 167
An evaluation of sustainable cultural practices for rainfed sorghum production on Vertisols in

east Sudan
T.J. Willcocks and S.J. Twomlow (Bedford, UK) 183

Vol. 24 No. 3 August 1992

Hydraulic resistance in puddled rice soils: measurement and effects on water movement
M.C.S. Wopereis, J.H.M. Wösten, J. Bouma, (Wageningen, Netherlands) and T. Woodhead (Manila, Philippines) 199
Influence of residue mulch, tillage and cultural practices on weed mass and corn yield from three field experiments
K.S. Gill, M.A. Arshad, (Beaverlodge, Alta., Canada), B.K. Chivunda, B. Phiri and M. Gumbo (Chilanga, Zambia) 211
Changes in soil organic C, microbial C and aggregate stability under continuous maize and cereal cropping, and after restoration to pasture in soils from the Manawatu region, New Zealand
G.P. Sparling, H.K. Kettles (Lower Hutt, New Zealand) and T.G. Shepherd, (Palmerston North, New Zealand) 225
Quantifying tillage erosion rates due to moldboard plowing
M.J. Lindstrom, (Morris, MN, USA), W.W. Nelson, (Lamberton, MN, USA) and T.E. Schumacher (Brookings, SD, USA) 243
Uniaxial compaction effects on soil physical properties in relation to soil type and cultivation
M.F. O'Sullivan (Penicuik, UK) 257
Economics of rotation and tillage systems for the dark brown soil zone of the Canadian Prairies
R.P. Zentner, C.A. Campbell, G.J. Sonntag (Swift Current, Sask., Canada), S.A. Brandt and K.J. Kirkland (Scott, Sask., Canada) 271
Effect of enamel coating on the field performance of a mouldboard plough
V.M. Salokhe, Suharno and D. Gee-Clough (Bangkok, Thailand) 285

Announcement 299

Vol. 24 No. 4 September 1992

Special issue: Reduction of Traffic-Induced Soil Compaction

Editorial
Reduction of traffic-induced soil compaction
J.H. Taylor (Auburn, AL, USA) 301

Reduction of traffic-induced soil compaction: a synthesis
W.C.T. Chamen (Silsoe, UK), G.D. Vermeulen (Wageningen, Netherlands), D.J. Campbell (Penicuik, UK) and C. Sommer (Braunschweig, Germany) 303
Managing traffic-induced soil compaction by using conservation tillage
C. Sommer and M. Zach (Braunschweig, Germany) 319
The potential of a low ground pressure traffic system to reduce soil compaction on a clayey loam soil
G.D. Vermeulen and J.J. Klooster (Wageningen, Netherlands) 337
Assessment of a wide span vehicle (gantry) and soil and cereal crop responses to its use in a zero traffic regime
W.C.T. Chamen, C.W. Watts, P.R. Leede and D.J. Longstaff (Silsoe, UK) 359
Prediction of aspects of soil–wheel systems
A.J. Koolen, D.A.G. Kurstjens, J.J.H. van den Akker, W.B.M. Arts (Wageningen, Netherlands) and P. Lerink (Haringvliet, Netherlands) 381

Zero and conventional traffic systems for potatoes in Scotland, 1987–1989
J.W. Dickson, D.J. Campbell, and R.M. Ritchie (Penicuik, UK) 397
Soil and crop responses to conventional, reduced ground pressure and zero traffic systems for grass silage production
J.T. Douglas, D.J. Campbell and C.E. Crawford (Penicuik, UK) 421
